

Problem Statement

You are given an integer, N . Write a program to determine if N is an element of the *Fibonacci Sequence*.

The first few elements of fibonacci sequence are 0, 1, 1, 2, 3, 5, 8, 13, \dots A fibonacci sequence is one where every element is a sum of the previous two elements in the sequence. The first two elements are 0 and 1.

Formally:

$$\begin{aligned} fib_0 &= 0 \\ fib_1 &= 1 \\ &\vdots \\ fib_n &= fib_{n-1} + fib_{n-2} \forall n > 1 \end{aligned}$$

Input Format

The first line contains T , number of test cases.

T lines follows. Each line contains an integer N .

Output Format

Display **IsFibo** if N is a fibonacci number and **IsNotFibo** if it is not a fibonacci number. The output for each test case should be displayed in a new line.

Constraints

$$1 \leq T \leq 10^5$$

$$1 \leq N \leq 10^{10}$$

Sample Input

```
3
5
7
8
```

Sample Output

```
IsFibo
IsNotFibo
IsFibo
```

Explanation

5 is a Fibonacci number given by $fib_5 = 3 + 2$

7 is not a Fibonacci number

8 is a Fibonacci number given by $fib_6 = 5 + 3$

TimeLimit

Time limit for this challenge is given [here](#)
